

Dear Sir or Madam,

Thank you for purchasing your new magnetic signs from South West Computing.

Every care is taken to ensure that they have arrived with you in perfect condition. However, if they are in any way damaged please contact us immediately to request that they be replaced free of charge.

**Important.**

Your new magnetic signs should last several years, however, the following notes should be read before use.

- 1 Do not fold or crease these signs.
- 2 If you roll them up, please roll loosely with the plain side inwards.
- 3 Take care not to cause curling or damage to the edges.
- 4 Clean with warm, slightly soapy water only.
- 5 Do not wipe or wash with spirits or de-greasing agents.
- 6 Do not expose to naked flames or extreme heat. (They may melt)
- 7 Do not freeze (This will make them brittle)
- 8 If they become curled or creased lay flat on a warm (not hot) surface to soften. (This usually removes curling and can sometimes help)

Your new signs will not adhere to wood, alloy, plastic or fibreglass panels. They should be placed in the required position making full contact with the panel. At high speeds magnetic signs should hold securely to the panel, however if the wind gets underneath they may lift and be blown off of the panel. For this reason avoid allowing the signs to become curled or creased.

South West Computing accept no responsibility for any inappropriate, offensive or otherwise improper wording that you may have chosen to have on your signs. You are reminded that in the UK you may commit an offence if you place offensive comments on a vehicle. These signs are provided for information purposes only and are intended to be read only by individuals who will not be distracted from safe driving during reading these signs. South West Computing accept no responsibility for any accident or injury caused as a result of any inappropriate placement and/or inappropriate care or usage of these signs.
